

UO Care Provider Networks

Are you looking for help this summer with childcare, tutoring or elder care?

The [UO Caregiver Networks](#) help UO families identify care providers and shared care opportunities. These lists are exclusively for members of the UO Community. Both lists include information about UO affiliation, types of care, experience, availability, and completed trainings.

Only those with a UO email address can access the network. UO families looking for care can log in with their DuckID to securely view care provider and shared care information. UO families work directly with care providers to discuss opportunities, schedules and pay rates. Similarly, families looking to share care can view the UO Shared Care list for possible matches and reach out to individual families
