

# **Graduate Student Practicum/Clinical Externship Program Child Development and Rehabilitation Center Oregon Health & Science University (OHSU) Academic Year: 2021-2022**

The Division of Psychology continues its training program for graduate students pursuing advanced degrees in clinical psychology for the 2021-2022 academic year. This program is designed to provide training in assessment and pediatric behavioral health care within an ambulatory medical environment.

For the academic year 2021-2022, we have a total of 24 positions available; however, **4 part-time (or can be an add-on to another placement) and 15 full-time** positions are available to students at three local graduate programs.

For the Assessment practicum positions, practicum students must have taken a course in child assessment. For the treatment practicum positions (NICH and Long-Term Follow-Up Clinic), practicum students must have experience in treatment of children and adolescents. **All students must be within 4-6 weeks of earning their Masters degree** (Practicum II, III and Clinical Field Work) to be eligible for our positions, for the exception of Master level graduate students from Lewis and Clark who are applying to the NICH program. All interested applicants must submit an updated curriculum vita and writing sample.

All practicum students will **start on July 1<sup>st</sup>** (or as agreed upon in advance) and **end June 30<sup>th</sup>**. Our positions are 12-months long (no exceptions). Students will be expected to attend a mandatory practicum orientation in the Spring (usually around May). In addition, students must successfully complete a drug screen, background check, provide proof of up-to-date immunizations, and complete the OHSU-approved TB testing prior to starting; these services will not be covered through OHSU. Additionally, trainees will be required to complete several on-line trainings prior to patient contact. We offer 2 weeks of vacation (i.e., absence from clinic on 2 occasions for clinics meeting once a week; absence from clinic on 4 occasions for clinics meeting twice a week). Additional days off for professional development time, including interviews for internships, may be negotiated with each supervisor. Metered parking is available on the streets around OHSU, or students may buy a full-day parking permit for \$15 per day. Students are eligible to purchase annual tri-met bus passes at significantly discounted rates through OHSU.

Potential practicum students will be nominated by their Directors of Graduate Training. The OHSU faculty member who serves as the practicum supervisor for the specific position of interest to the candidate will review credentials and, as appropriate, conduct an interview. If that supervisor feels the candidate is not a good match for the placement, but feels the candidate may be appropriate for another position, the candidate's application will be shared with other OHSU practicum supervisors. The selection and notification process will follow the guidelines that have been established for students from Pacific University, George Fox University, and the University of Oregon. Actual start dates (near

July 1<sup>st</sup>) will be negotiated with supervisors after students have been offered and accepted a specific practicum position.

Questions about specific clinics/positions should be directed to the faculty supervisor (see attached descriptions). General questions about our program can be directed to Mina D. Nguyen, Psy.D. (504) 494-1093 or [nguyendr@ohsu.edu](mailto:nguyendr@ohsu.edu).

Agency Name	<b>OHSU CDRC Autism Program:</b> <b><u>Tues all day older child- teen</u></b> (1 trainee)  <b><u><del>Wed am early childhood</del> (1 trainee)- WEDNESDAY</u></b> <b><u>NOT OFFERED FOR 2021-2022 YEAR</u></b>
Contact (Name, Degree, Agency Title)	Susanne Duvall, PhD duvall@ohsu.edu Assistant Professor of Pediatrics
Address	OHSU-CDRC 707 SW Gaines RD Portland OR 97239-2997
Travel Time (from downtown Portland)	10-15 min by car, 20-30 min by bus from downtown Portland.
Phone	503.494.2269; fax 503.494.6868
Populations served	The Wednesday early childhood clinic generally serves children 2-6 years old. The Tuesday clinic usually sees children 9-20 years old. Both clinics see a wide range of children with complex developmental, behavioral and psychiatric conditions who have been referred for a concern of possible ASD.
Training experiences	Interdisciplinary team assessment (with Occupational therapy), differential diagnosis, diagnostic interviewing, integrated report writing, case conceptualization/ presentation, and supportive parent feedback in an outpatient hospital setting. Administration and interpretation of standardized autism assessment instruments (BOSA, ADOS-2 if COVID precautions change in the future) and other developmental, cognitive, and behavioral tools. Participation in treatment and research activities are available depending on interests of trainee. <b><u>Students may choose to do both experiences simultaneously, with program approval or 1 student may do the Tuesday clinic and a different student may do the Wednesday half day clinic.</u></b>
Didactic Training	A host of didactic training opportunities, including ASD research-clinical monthly seminars and Journal Club, Pediatric Grand Rounds, Psychology Intern training seminars, Psychology Division Journal Club, interdisciplinary CDRC research and training forums, etc. are available. None are required.
Supervision	<ul style="list-style-type: none"> <li>• Susanne Duvall, PhD and Ambreen Shahabuddin PhD</li> <li>• Tiered supervised supervision with a post-doctoral resident</li> <li>• Live supervision predominantly</li> </ul>

<b>Hours (e.g., hours of clinic operation, required meeting times, months center is in operation)</b>	Diagnostic clinics are held Tuesday 8-5pm (adolescent-child); <b>Wednesday 8-2 (toddler)</b> . Trainees may participate consistently in 1 or more clinics depending on desired experiences. Report writing and other indirect activities are done outside of the clinical day and count toward the 15+ hours per week (for full day placement) or 8+ hours per week (for half day).
<b>Evenings/Weekends?</b>	No
<b>Typical Number and Level of Trainees</b>	1-2 practicum trainees (Practicum III or Clinical Fieldwork Students) are taken each year.
<b>Required classes (specify)</b>	Assessment I, Assessment of Children
<b>Prior training experience (specify)</b>	Direct clinical experience with children, interest in ASD, and exposure to standardized intellectual and developmental testing is preferred (e.g., WISC-V, WPPSI-IV, Mullen, DAS-II, etc.). Students will have supported opportunities to learn new assessment instruments outside and within the clinic day.
<b>Masters degree required (Y/N)</b>	Must be within 4-6 weeks of earning Masters degree
<b>Trainee level accepted (II, III, CFW)</b>	Practicum Level III and Clinical Field Work
<b>Additional Site Information</b>	The CDRC Autism Program is a national SPARK clinical site, is the only medical teaching hospital in Oregon providing multidisciplinary autism diagnostic assessment across the lifespan, and is also an Autism Center of Excellence for the state of Washington. As the diagnostic team available to families served by public insurance in both states, the clinic's patient families represent a very diverse population. <i>Approximately 50% of patients referred do not receive a diagnosis of ASD, providing a rich training experience in differential diagnosis across an array of psychiatric and developmental disorders.</i>
<b>SPP Notes</b>	Child Track Preference

<b>Agency Name</b>	<b><u>OHSU CDRC Infant/Child Assessment Clinic</u></b>
<b>Contact (Name, Degree, Agency Title)</b>	Sage N. Saxton, PsyD, Associate Professor, Pediatrics saxtons@ohsu.edu
<b>Address</b>	PO Box 574 Portland OR 97207
<b>Travel Time (from downtown Portland)</b>	10-15 min by car, 20-30 min by bus from downtown Portland
<b>Phone</b>	503.494.2672
<b>Populations served</b>	<p>Infants and young children (up to 3 years) who were born prematurely and/or who had cardiac surgery and their families. The trainee will conduct developmental assessments using the Bayley Scales of Infant and Toddler Development, Fourth Edition (Bayley4) (2<sup>nd</sup>/4<sup>th</sup> Fridays).</p> <p>The training experience <u>may</u> also offer opportunity with children ages 3-6 with behavioral, emotional, and/or cognitive difficulty and their families.</p>
<b>Training experiences</b>	<p>There <u>may</u> also be opportunity to interview and assess young children and their families using a variety of assessment measures (e.g. SB5, WISC V, WPPSI IV). (1/3/5<sup>th</sup> Tuesdays).</p> <p>In addition to assessment oriented experiences, the trainee may have the opportunity to engage in research, manuscript preparation, and/or assist with other special projects beyond the clinical day.</p>
<b>Didactic Training</b>	A host of didactic training opportunities, including Pediatric Grand Rounds, Psychology Intern training seminars, Psychology Division Journal Club, interdisciplinary CDRC training forums, etc., are available. None are required.
<b>Supervision</b>	Live and traditional supervision provided. Sage Saxton Psy.D. (Clinical Psychology) with some supervision possibly provided by a Post Doctoral Resident.
<b>Hours (e.g., hours of clinic operation, required meeting times, months center is in operation)</b>	Estimated 10-16 hours per clinic week. Report writing and other indirect activities are done outside of the clinical day and count toward the 10-16 hours per week. Optional didactic training opportunities are above and beyond the 10-16 hours.
<b>Evenings/Weekends?</b>	No

<b>Typical Number and Level of Trainees</b>	One practicum trainee is taken each year. The practicum trainee <u>must</u> have a Master's degree within 4-6 weeks of July 1, with documentation of this provided.
<b>Required classes (specify)</b>	Assessment I, Assessment of Children
<b>Prior training experience (specify)</b>	Assessment of children and adolescents with developmental and/or behavioral disorders preferred. Students will be provided with opportunity to learn assessment techniques they are unfamiliar with outside of the clinic day.
<b>Masters degree required (Y/N)</b>	Must be within 4-6 weeks of earning Masters degree
<b>Trainee level accepted (II, III, CFW)</b>	Practicum Level II, III and Clinical Field Work
<b>SPP Notes</b>	Child Track Preference

<b>Agency Name</b>	<b><u>OHSU CDRC ADHD/LD Assessment Clinic: 1 trainee on Monday (with the option for Tuesday evaluation experiences, if interested)</u></b>
<b>Contact (Name, Degree, Agency Title)</b>	Darren Janzen, PsyD Associate Professor of Pediatrics & Psychiatry janzend@ohsu.edu
<b>Address</b>	PO Box 574 Portland OR 97207
<b>Travel Time (from downtown Portland)</b>	10-15 min by car, 20-30 min by bus from downtown Portland.
<b>Phone</b>	503.494.3526
<b>Populations served</b>	Children age 5-18 with learning, developmental, and/or behavioral disorders and their families.
<b>Training experiences</b>	<p>Training will involve a variety of assessment experiences, depending on interests of the successful applicant and the specific clinical activities of supervising faculty. Focus will be on interdisciplinary assessment in an outpatient hospital context. Patient populations will include, but may not be limited to, children and adolescents with concerns regarding attention, activity level/impulsivity, emotional and behavioral challenges, and learning difficulties. Special emphasis will be on assessing for ADHD and/or Learning Disabilities within older children and adolescents within an interdisciplinary clinic model. The trainee will assess one child weekly, as well as assisting with other complex evaluations as available, and will have opportunity for practice in case coordination and feedback, as skill allows. The trainee will be expected to write at least one psychological report each week.</p> <p>In addition to assessment oriented experiences, the trainee may have the opportunity to engage in consultation services with faculty, help co-facilitate intervention with pediatric feeding disordered patients, be involved in OHSU/ADHD clinical rounds, provide evaluations for DDS, and assist with other special projects (Feeding, PKU, MPS, etc.) – all based on the students expressed interest.</p>
<b>Supervision</b>	Darren Janzen, PsyD (Clinical Psychology) Specialty in assessment and treatment Theoretical orientation: Cognitive Behavioral Live and traditional supervision provided

<b>Hours</b>	<p>Estimated 10 hours per week for ADHD/LD clinic involvement. Clinics run every Monday from 8:30am to 5:00pm with report writing time offered in the afternoon. Additional report writing and other indirect activities are done outside of the clinical day.</p> <p>If interested, the student can be involved in Tuesday's evaluation/intervention opportunities as well, which would increase the time commitment.</p> <p>Currently, didactic training opportunities are above and beyond the expected hours and are open to the student as interested.</p>
<b>Evenings/Weekends?</b>	No
<b>Typical Number and Level of Trainees</b>	One practicum trainee is taken each year. The practicum trainee must be within 4-6 weeks of earning a Master's degree.
<b>Required classes (specify)</b>	Assessment I, Assessment of Children
<b>Prior training experience (specify)</b>	Students with experience with assessment of children and adolescents with developmental and/or behavioral disorders are preferred. Students will be provided with opportunity to learn assessment techniques they are unfamiliar with outside of the clinic day.
<b>Masters degree required (Y/N)</b>	Must be within 4-6 weeks of earning Masters degree
<b>Trainee level accepted (II, III, CFW)</b>	Practicum Level II, III and Clinical Field Work
<b>SPP Notes</b>	Child Track Preference

<b>Agency Name</b>	<b><u>CDRC Assessment Clinic: 1 trainee on Wednesdays</u></b>
<b>Contact (Name, Degree, Agency Title)</b>	Mina D. Nguyen-Driver, PsyD, Clinical Associate Professor of Pediatrics nguyendr@ohsu.edu
<b>Address</b>	PO Box 574 Portland OR 97207
<b>Travel Time (from downtown Portland)</b>	10-15 min by car, 20-30 min by bus from downtown Portland.
<b>Phone</b>	503.494.1093
<b>Populations served</b>	Infants and Children ages 2 weeks old to 18+ years old with genetic, developmental, and/or behavioral disorders and their families. Patients are from the Craniofacial (infants and toddlers), Spina Bifida (school age) and Hemophilia Clinics (school age to adults).
<b>Training experiences</b>	Training will involve a variety of assessment experiences, depending on interests of the successful applicant and the specific clinical activities of supervising faculty. Focus will be on interdisciplinary assessment in an outpatient hospital context. Patient populations will include, but may not be limited to, children and adolescents with concerns regarding attention, activity level/impulsivity, emotional and behavioral challenges, and learning difficulties. The trainee will assess one to two children every Wednesday. The trainee will be expected to write <b>one to two</b> psychodiagnostic reports weekly.
<b>Didactic Training</b>	A host of didactic training opportunities, including Pediatric Grand Rounds, Psychology Intern training seminars, Psychology Division Journal Club, interdisciplinary CDRC training forums, etc, are available. None are required.
<b>Supervision</b>	Mina Nguyen-Driver, PsyD (Clinical Psychology) Specializes in pediatric psychology and neuropsychological assessment Traditional and live supervision
<b>Hours (e.g., hours of clinic operation, required meeting times, months center is in operation)</b>	15-20 hours per week. Clinic meets every Wednesday from 8:30am to 5pm. Report writing and other indirect activities are done outside of the clinical day and count toward the 15-20 hours per week. Currently, didactic training opportunities are above and beyond the 15-20 hours.
<b>Evenings/Weekends?</b>	No
<b>Typical Number and Level of Trainees</b>	One practicum trainee (Practicum II, III or Clinical Fieldwork Students) is taken each year.
<b>Required classes (specify)</b>	Cognitive Assessment

<b>Prior training experience (specify)</b>	<p>Students with experience with assessment of children and adolescents with developmental and/or behavioral disorders are preferred. Students will be provided with opportunity to learn assessment techniques they are unfamiliar with outside of the clinic day.</p> <p>Students should have experience in a variety of assessment tools: WISC-V, WPPSI-IV, Stanford-Binet 5, Leiter, WIAT-III, and Bayley Scales of Infant Development-III. Students will be provided with opportunity to learn assessment techniques they are unfamiliar with outside of the clinic day.</p>
<b>Masters degree required (Y/N)</b>	Must be within 4-6 weeks of earning Masters degree
<b>Trainee level accepted (II, III, CFW)</b>	Practicum Level II, III and Clinical Field Work
<b>SPP Notes</b>	Child Track Preference

<b>Agency Name</b>	<b><u>OHSU CDRC NICH (Novel Interventions in Children's Healthcare) 1-2 trainees</u></b>
<b>Contact (Name, Degree, Agency Title)</b>	Kim Spiro, PhD wagnedav@ohsu.edu Assistant Professor, Pediatrics
<b>Address</b>	OHSU-CDRC 707 SW Gaines RD Portland OR 97239-2997
<b>Travel Time (from downtown Portland)</b>	10-15 min by car, 20-30 min by bus from downtown Portland.
<b>Phone</b>	503.494.8942; fax 503.494.6868
<b>Populations served</b>	Children and adolescents with complex medical conditions (e.g., diabetes, cystic fibrosis, cancer, end stage renal disease, chronic pain) and psychosocial vulnerability (e.g., families with food and housing insecurity, high family conflict).
<b>Training experiences</b>	Implementation of intensive behavioral health that includes family-based problem solving, care coordination, and case management. Participation in research-related activities also possible.
<b>Didactic Training</b>	A host of didactic training opportunities, including Pediatric Grand Rounds, Psychology Intern training seminars, Psychology Division Journal Club, interdisciplinary CDRC training forums, etc, are available. None are required.
<b>Supervision</b>	Kim Spiro, Ph. D.
<b>Hours (e.g., hours of clinic operation, required meeting times, months center is in operation)</b>	Minimum of 15 hours per week. Students must be willing to travel to the homes of patients to provide direct care and must be willing to attend clinic appointments with patients and their families. The students must also be willing to carry a project cell phone and field any emergency calls from patients regarding their functioning and care.
<b>Evenings/Weekends?</b>	Both evenings and weekends.
<b>Typical Number and Level of Trainees</b>	One to two practicum trainees are taken each year, either from Pacific University, University of Oregon, Lewis and Clark, or George Fox University.
<b>Required classes (specify)</b>	None
<b>Prior training experience (specify)</b>	Advanced clinical training with children and adolescents.
<b>Masters degree required (Y/N)</b>	Must be within 4-6 weeks of earning Masters degree
<b>Trainee level accepted (II, III, CFW)</b>	Practicum Level II, III and Clinical Field Work

<b>Additional Site Information</b>	In addition to receiving training in intensive behavioral health, students will have the opportunity to participate in other pediatric psychology activities, such as program development and research. Interested students must provide current CV and be approved by Dr. Spiro.
<b>SPP Notes</b>	Child Track Preference

<b>Agency Name</b>	<b><u>OHSU CDRC Diagnostic Intake Clinic: 1 trainees on Mondays (possibly 2 if combined with Anxiety Treatment Clinic)</u></b>
<b>Contact (Name, Degree, Agency Title)</b>	Danny C. Duke, Ph.D., Assistant Professor of Pediatrics and Psychiatry duke@ohsu.edu
<b>Address</b>	PO Box 574 Portland OR 97207
<b>Travel Time (from downtown Portland)</b>	10-15 min by car, 20-30 min by bus from downtown Portland.
<b>Phone</b>	(503) 494-2243
<b>Populations served</b>	Children and adolescents ages 3 to 18+ years old with psychological, developmental, or behavioral disorders and their families. Patients come from a variety of diverse racial and ethnic backgrounds and often have complex developmental, medical, or mental health comorbidities.
<b>Training experiences</b>	Training will involve a variety of experiences, depending on the interests and skills of the successful applicant. Focus is on brief diagnostic assessment, including clinical interview, in the context of a tertiary outpatient hospital setting (OHSU). Patient populations typically present with a variety of concerns, such as anxiety, behavioral problems (ODD, DBD), and ADHD. The trainee will assist with informed consent, clinical interview, screening and scoring, conceptualization, formulating differential diagnoses, and providing feedback and recommendations for one to four families every Monday. The trainee will be expected to write up to 4 integrated reports weekly. Program development opportunities are available.
<b>Didactic Training</b>	Multiple didactic training opportunities are available, including Pediatric and Psychiatry Grand Rounds, Psychology Intern training seminars, Psychology Division Journal Club, and other interdisciplinary CDRC training forums. None are required.
<b>Supervision</b>	Danny Duke, PhD specializes in pediatric psychology and anxiety disorders assessment and treatment. Traditional and live supervision.
<b>Hours (e.g., hours of clinic operation, required meeting times, months center is in operation)</b>	<u>Direct patient contact 7-10 hours per week.</u> Clinic meets every Monday from 7:30am to 5:15pm. Expectations are that some report writing and other indirect activities will be accomplished outside of the clinical day of 7-10 hours, for <u>14-20 total hours per week</u> . The didactic training opportunities require a time commitment above and beyond the above stated hours. Often combined with the Fear and Anxiety Disorders Treatment Clinic Practicum

<b>Evenings/Weekends?</b>	No
<b>Typical Number and Level of Trainees</b>	One practicum trainee (Practicum II, III or Clinical Fieldwork Students) are accepted each year.
<b>Required classes (specify)</b>	Child Psychopathology; Developmental Psychology
<b>Prior training experience (specify)</b>	Students having experience in the assessment of children and adolescents with developmental and/or behavioral disorders are preferred. Students will be provided opportunities to learn and gain experience with DSM-5, differential diagnoses, informed consent, clinical interviewing, treatment conceptualization, and providing families feedback and referrals. Students should have basic experience in the administration and scoring of a variety of measures, including, SDQ, CDI, SCARED, ECBI, etc.
<b>Masters degree required (Y/N)</b>	Must be within 4-6 weeks of earning Masters degree
<b>Trainee level accepted (II, III, CFW)</b>	Practicum Level II, III and Clinical Field Work
<b>SPP Notes</b>	Child Track Preference

<b>Agency Name</b>	<b>OHSU CDRC Anxiety Treatment Clinic (2 opportunities): 1 trainee on Wednesdays Full day (A) and 1 trainee on Fridays Full Day (B) FRIDAY IS NOT OFFERED FOR YEAR 2021-2022</b>
<b>Contact (Name, Degree, Agency Title)</b>	Danny C. Duke, Ph.D., Associate Professor of Pediatrics and Psychiatry duke@ohsu.edu
<b>Address</b>	PO Box 574, Portland OR 97207
<b>Travel Time (from downtown Portland)</b>	OHSU is 10-15 min by car, 20-30 min by bus from downtown Portland.
<b>Phone</b>	(503) 494-2243
<b>Populations served</b>	Children and adolescents ages 3 to 18+ years old presenting for a variety of anxiety and anxiety-related difficulties. Patients come from a variety of diverse racial and ethnic backgrounds. Given our tertiary hospital setting, patients are often have medical and/or developmental complexity.
<b>Training experiences</b>	Training will involve a variety of experiences, adjusted to best meet the interests and skills of the successful applicant. The focus will be delivering empirically supported anxiety treatment (ERP). Patients present with a variety of anxiety disorders and related concerns that include generalized, separation, and social anxiety disorders, OCD, phobias, selective mutism, PTSD, and anxiety-related eating disorders (e.g., choking or vomiting phobias). The trainee will assist with clinical interview, assessment, differential diagnosis, feedback, treatment planning, treatment delivery (CBT with ERP), progress notes, and assessing patient progress. Patient flow is variable, but trainees will have the opportunity for live delivery of care for up to 11 patients (8 hours of direct patient contact) and their families. Opportunities may be available to deliver anxiety treatment to select patients through telemedicine. Program development opportunities are also available. The trainee will be expected to write up to 11 weekly reports.
<b>Didactic Training</b>	Multiple didactic training opportunities are available, including Pediatric and Psychiatry Grand Rounds, Psychology Intern training seminars, Psychology Division Journal Club, and other interdisciplinary CDRC training forums. None are required.

<b>SPP Notes</b>	Child Track Preference

<b>Agency Name</b>	<b><u>OHSU Neuro-Oncology Neuropsychology Screening Consultation Practicum: (part-time position or this could be an add-on to a current practicum position): 1 trainee on 3<sup>rd</sup>, 4<sup>th</sup> and 5<sup>th</sup> Wednesday afternoons.</u></b>
<b>Contact (Name, Degree, Agency Title)</b>	Susanne Duvall, PhD Associate Professor, Pediatrics
<b>Address</b>	OHSU-CDRC 707 SW Gaines RD Portland OR 97239-2997
<b>Travel Time (from downtown Portland)</b>	10-15 min by car, 20-30 min by bus from downtown Portland.
<b>Phone</b>	503-494-2269 (Dr. Duvall's office)
<b>Populations served</b>	Children and adolescents with brain tumors who are in need of neuropsychology screening.
<b>Training experiences</b>	<p><b><i>Since this placement is with an immunocompromised population, specifics about the training experience will be vary with the precautions needed at the time. This will either be in person or virtual.</i></b></p> <p><b>Virtual plans:</b> The trainee will help to conduct 1-2 comprehensive diagnostic interviews per clinic day, primarily for youth involved with the neuro-oncology clinic and the pediatric brain tumor program. Impressions and next steps will be shared with the family as well as a written report.</p> <p><b>In person plans:</b> Each week of clinic (2-3 times per month) the trainee will participate in 3-4 brief neuropsychological interviews and screenings for youth who are involved in the Neuro-Oncology clinic. The trainee will conduct interviews, write 3-4 brief reports and consult with the neuro-oncology team. Neuro-oncology team meeting and MRI review will occur at the start of clinic.</p>
<b>Didactic Training</b>	The pre-internship trainee has available to him/her a host of didactic training opportunities. These include required Neuro-oncology Team meetings and radiology (MRI) review that occurs on Wednesdays 12:30-1:30pm. Other possible training opportunities are not required but include: Pediatric Grand Rounds, Psychology Intern training seminars, Neuropsychology Didactics, Psychology Division Journal Club, interdisciplinary CDRC training forums, etc.

<b>Supervision</b>	Dr. Duvall is a Pediatric Neuropsychologist with expertise in brain-behavior relationships. Tiered supervision will also occur with a postdoctoral resident. Either Dr. Duvall or the resident will provide live supervision and supervise the trainee in the areas of neuropsychological consultation and evaluation.
<b>Hours (e.g., hours of clinic operation, required meeting times, months center is in operation)</b>	5-10 hrs/wk total. This practicum experience includes 3-5 hours/wk of face-to-face time with patients on the weeks that clinic is offered; Clinic occurs on the 3 <sup>rd</sup> , 4 <sup>th</sup> and 5 <sup>th</sup> Wednesdays of the month from 12:30-6pm. Report writing and other indirect activities are done outside of the clinical day and count toward the 5-10 hours.
<b>Evenings/Weekends?</b>	No.
<b>Typical Number and Level of Trainees</b>	One practicum trainee (Practicum III or Clinical Fieldwork Students) is accepted each year.
<b>Required classes (specify)</b>	Child Psychopathology; Developmental Psychology; Child Assessment, (Preferred) Neuropsychological Assessment.
<b>Prior training experience (specify)</b>	Clinical training with children and adolescents, consultation, psychosocial screening, previous assessment experience.
<b>Masters degree required (Y/N)</b>	Must be within 4-6 weeks of earning Masters degree.
<b>Trainee level accepted (II, III, CFW)</b>	Practicum Level III and Clinical Field Work.
<b>Additional Site Information</b>	Medical setting exposure
<b>SPP Notes</b>	Pediatric Neuropsych Track preference.

Agency Name	<b>OHSU DCH Peds Hem/Onc Neuropsychology Clinic (Full-Time practicum training position): 1 trainee <u>on Mondays or Tuesdays or Wednesdays. MONDAY NOT OFFERED FOR 2021-2022 YEAR</u></b>
Contact (Name, Degree, Agency Title)	Justin B. Lee, PhD, Assistant Professor of Pediatrics <a href="mailto:justi@ohsu.edu">justi@ohsu.edu</a>
Address	PO Box 574 Portland OR 97207
Travel Time (from downtown Portland)	10-15 min by car, 20-30 min by bus from downtown Portland.
Phone	503-494-7325 (Dr. Lee's office)
Populations served	Children and adolescents with various oncology history who are in need of a neuropsychological evaluation.
Training experiences	Training will involve a scaffolded experience with neuropsychological evaluations. The trainee will be expected to complete <b>one neuropsychological assessment</b> per week that will consist of a thorough medical chart review, clinical interview, evaluation of neurocognitive domains, written report, and feedback to caregivers/parents. The experience will be tailored to the trainee's level of expertise. Opportunity to co-lead cancer survivorship support group once a month.
Didactic Training	A host of didactic training opportunities will be available to the trainee, including Pediatric Grand Rounds, Psychology Intern training seminars, Neuropsychology Didactics, Psychology Division Journal Club, etc. None are required.
Supervision	Dr. Lee is a Clinical Psychologist who specializes in pediatric neuropsychology. Traditional and live supervision will be provided.
Hours (e.g., hours of clinic operation, required meeting times, months center is in operation)	15-20 hours per week. This practicum experience includes approximately 5 to 8 hrs/wk of face-to-face time with patients. Report writing and other indirect activities are done outside of the clinical day and count towards the 15-20 hours per week. Currently, didactic training opportunities are above and beyond the 15-20 hours.
Evenings/Weekends?	No
Typical Number and Level of Trainees	Two practicum trainees (Practicum II, III or Clinical Fieldwork Students) are accepted each year.
Required classes (specify)	Cognitive Assessment, Child Assessment, (Preferred) Neuropsychological Assessment

<b>Prior training experience (specify)</b>	Trainees with experience with cognitive or neuropsychological assessment of children and adolescents are preferred. Trainees will be provided with opportunity to learn assessment techniques they are unfamiliar with outside of the clinic day.
<b>Masters degree required (Y/N)</b>	Must be within 4-6 weeks of earning Masters degree
<b>Trainee level accepted (II, III, CFW)</b>	Practicum Level II, III and Clinical Field Work
<b>Additional Site Information</b>	Interested trainees can contact (email is preferred) Dr. Lee to discuss additional details.
<b>SPP Notes</b>	Child Track Preference; Pediatric/Neuropsych Track Preference.

<b>Agency Name</b>	<b><u>OHSU DCH Long-Term Follow-Up Clinic (part-time position or this could be an add-on to a current practicum position): 1 trainee on Friday afternoons</u></b>
<b>Contact (Name, Degree, Agency Title)</b>	Justin B. Lee, PhD, Assistant Professor, Pediatrics <a href="mailto:justi@ohsu.edu">justi@ohsu.edu</a>
<b>Address</b>	PO Box 574 Portland OR 97207
<b>Travel Time (from downtown Portland)</b>	10-15 min by car, 20-30 min by bus from downtown Portland.
<b>Phone</b>	503-494-7325 (Dr. Lee's office)
<b>Populations served</b>	Children and adults aged 2 years through adulthood with a history of pediatric cancer (e.g., leukemias, bone and soft tissue tumors, brain tumors) with a range of physical and cognitive functioning.
<b>Training experiences</b>	Training will involve participating in and learning to conduct psychosocial and neurocognitive screening for late effects of pediatric oncology diagnosis and treatment. Focus will be on working in an interdisciplinary team and providing a component of an interdisciplinary comprehensive evaluation in an outpatient hospital context. Patient populations will include, but may not be limited to, children, adolescents, and adults with concerns regarding PTSD, adjustment, and academic difficulties. Trainees will participate in screening one to six individuals every Friday. The trainee will be expected to write <b>one to three</b> screening notes weekly. Opportunity to co-lead support group once a month.
<b>Didactic Training</b>	A host of didactic training opportunities, including Pediatric Grand Rounds, Psychology Intern training seminars, Psychology Division Journal Club, interdisciplinary CDRC training forums, etc, are available. None are required.
<b>Supervision</b>	Dr. Lee is a Clinical Psychologist who specializes in pediatric neuropsychology. Traditional and live supervision will be provided.
<b>Hours (e.g., hours of clinic operation, required meeting times, months center is in operation)</b>	5-10 hours per week. Clinic meets every Friday from 12:00 – 6:00 pm. Report writing and other indirect activities are done outside of the clinical day and count toward the 5-10 hours. Currently, didactic training opportunities are above and beyond the 5-15 hours.
<b>Evenings/Weekends?</b>	No
<b>Typical Number and Level of Trainees</b>	One practicum trainee (Practicum II, III or Clinical Fieldwork Students) is taken each year.

<b>Agency Name</b>	<b>NOT OFFERED FOR 2021-2022 YEAR</b> <b>OHSU DCH Pediatric Neuropsychology Clinic</b> <b>(General Pediatric Neuropsychology Focus)</b> <b>(Full-Time practicum training position):</b> <b>1 trainee on Tuesdays</b>
<b>Contact (Name, Degree, Agency Title)</b>	Skyler Leonard, PhD, Psychologist Resident (postdoctoral fellow in pediatric neuropsychology) <a href="mailto:leonarsk@ohsu.edu">leonarsk@ohsu.edu</a> Supervised by Mina D. Nguyen-Driver, PsyD, Clinical Associate Professor of Pediatrics <a href="mailto:nguyendr@ohsu.edu">nguyendr@ohsu.edu</a>
<b>Address</b>	PO Box 574 Portland OR 97207
<b>Travel Time (from downtown Portland)</b>	10-15 min by car, 20-30 min by bus from downtown Portland.
<b>Phone</b>	503-494-1557; 503-494-1093
<b>Populations served</b>	Children and adolescents with various neurological, medical, and developmental conditions (epilepsy, brain tumors, stroke, genetic disorders, traumatic brain injuries, concussion, etc.) who are in need of a neuropsychological evaluation.
<b>Training experiences</b>	Training will involve intensive training in neuropsychological evaluations with pediatric populations. The trainee and Dr. Leonard will complete one neuropsychological assessment every Tuesday. Gradually increasing responsibilities will include medical chart reviews, clinical interviews, administering neuropsychological tests, interpretation of results, providing feedback to families, and writing neuropsychological reports. An emphasis will be placed on increasing understanding of medical complexities, neurocognitive impacts, and brain/behavior relationships. Training will be tailored to the experience level and learning goals of the trainee.
<b>Didactic Training</b>	A host of didactic training opportunities will be available to the trainee, including Pediatric Grand Rounds, Psychology Intern training seminars, Neuropsychology Didactics, Psychology Division Journal Club, etc. None are required.
<b>Supervision</b>	Dr. Leonard is a Psychologist Resident (postdoctoral fellow in pediatric neuropsychology). Primary direct supervision will be provided by Dr. Leonard. Dr. Leonard is supervised by Dr. Mina Nguyen-Driver, Licensed Psychologist. Traditional and live supervision will be provided.

<b>Hours (e.g., hours of clinic operation, required meeting times, months center is in operation)</b>	15-20 hours per week. Clinic runs every Tuesday from 7:45am to 5:00pm. Report writing and other indirect activities are done outside of the clinical day and count toward the 15-20 hours per week. Currently, didactic training opportunities are above and beyond the 15-20 hours.
<b>Evenings/Weekends?</b>	No
<b>Typical Number and Level of Trainees</b>	One practicum trainee (Practicum II, III or Clinical Fieldwork Students) will be accepted.
<b>Required classes (specify)</b>	Cognitive Assessment and Child Assessment (Preferred)
<b>Prior training experience (specify)</b>	Past training and experience in psychoeducational, cognitive, and/or neuropsychological assessments is required. Experience in child and adolescent assessment is highly preferred. Trainees should be familiar with IQ testing and basics of clinical interviewing, but extensive experience with neuropsychological tests is not required. Trainees will have the opportunity to learn new assessment measures they are unfamiliar with.
<b>Masters degree required (Y/N)</b>	Must be within 4-6 weeks of earning Masters degree
<b>Trainee level accepted (II, III, CFW)</b>	Practicum Level II, III and Clinical Field Work
<b>Additional Site Information</b>	Interested trainees can contact (email is preferred) Dr. Leonard to discuss additional details.
<b>SPP Notes</b>	Child Track Preferred; Pediatric/Neuropsych/Assessment Track Preferred.

<b>Agency Name</b>	<b><u>OHSU Pediatric Gastroenterology Coping Clinic (part-time position or this could be an add-on to a current practicum position): 1 trainee Wednesday full day and/or Thursday half day</u></b>
<b>Contact (Name, Degree, Agency Title)</b>	Jacklyn E. Stellway, PsyD, Assistant Professor of Pediatrics <a href="mailto:stellway@ohsu.edu">stellway@ohsu.edu</a>
<b>Address</b>	PO Box 574 Portland OR 97207
<b>Travel Time (from downtown Portland)</b>	10-15 min by car, 20-30 min by bus from downtown Portland.
<b>Phone</b>	(503) 494-3703
<b>Populations served</b>	Children and adolescents ages 3 to 18+ years old presenting with a variety of gastrointestinal symptoms and chronic illnesses. Patients come from a variety of diverse SES, racial, and ethnic backgrounds from around the state. Patients are seen through DCH and outreach clinics (virtual visits).
<b>Training experiences</b>	Training will involve a variety of experiences, adjusted to best meet the interests and skills of the student. The focus will be on delivering behavioral health and psychological treatment within a multidisciplinary specialty medical clinic. Patients present with a variety of GI symptoms, adjustment to diagnosis, and challenges coping. Common referrals for Coping Clinic include functional abdominal pain, functional nausea/vomiting, rumination syndrome, and adjustment/coping with chronic illnesses such as inflammatory bowel disease, celiac disease, irritable bowel syndrome, liver disease. The trainee will assist with clinical interview, treatment planning, treatment delivery, progress notes, and consultation with medical team. Patient flow is variable. New and return patients will be seen. Opportunities may be available for inpatient consultation. The trainee will be expected to write treatment notes.
<b>Didactic Training</b>	Multiple didactic training opportunities are available, including Pediatric and Psychiatry Grand Rounds, Psychology Intern training seminars, Psychology Division Journal Club, and other interdisciplinary CDRC training forums. None are required.
<b>Supervision</b>	Jacklyn Stellway, PsyD, specializes in pediatric psychology. Live and traditional supervision provided.

<b>Hours (e.g., hours of clinic operation, required meeting times, months center is in operation)</b>	<p>6-15 hours per week. Opportunity for Wednesday full day (8am-5pm) or half day (12pm-5pm), and/or Thursday half day (12:30pm-5pm). Estimated direct patient involvement: up to 7 hours on Wednesday and 4 hours on Thursday. Additional treatment note writing and other indirect activities are done outside of the clinical day and count toward 6-14 total hours per week.</p> <p>Currently, didactic training opportunities are above and beyond the expected hours and are open to the student as interested.</p>
<b>Evenings/Weekends?</b>	No
<b>Typical Number and Level of Trainees</b>	One practicum trainee (Practicum II, III or Clinical Fieldwork Students) is accepted each year.
<b>Required classes (specify)</b>	Child Psychopathology; Developmental Psychology
<b>Prior training experience (specify)</b>	Students with child psychotherapy treatment experience are preferred. Students will be provided opportunities to gain experience with the delivery of empirically supported treatment for pediatric populations including patients with medical complexity. Students should have basic experience with clinical interview and cognitive behavioral interventions.
<b>Masters degree required (Y/N)</b>	Must be within 4-6 weeks of earning Masters degree
<b>Trainee level accepted (II, III, CFW)</b>	Practicum Level II, III and Clinical Field Work
<b>SPP Notes</b>	Child or Health Track Preference

<b>Agency Name</b>	<b>NOT OFFERED FOR 2021-2022 YEAR</b> <b>OHSU Healthy Lifestyles Clinic: 1 trainees on</b> <b>Wednesdays</b>
<b>Contact (Name, Degree, Agency Title)</b>	Kim Guion Reynolds, Ph.D., Associate Professor of Pediatrics guion@ohsu.edu
<b>Address</b>	PO Box 574 Portland OR 97207
<b>Travel Time (from downtown Portland)</b>	10-15 min by car, 20-30 min by bus from downtown Portland.
<b>Phone</b>	(503) 418-1832
<b>Populations served</b>	Children and adolescents ages 2 to 18 years old with obesity. Patients come from a variety of diverse racial and ethnic backgrounds and often have complex developmental, medical, or mental health comorbidities. 30% of our population have developmental disabilities.
<b>Training experiences</b>	Training will include participation in <b>(1)</b> a multidisciplinary team clinic every other week and <b>(2)</b> a single discipline intervention clinic every other week. Focus is on multidisciplinary team collaboration, assessment of health behaviors and accompanying psychosocial risk and protective factors, and providing brief behavioral recommendations for health behavior change. <b>Skills learned will be applicable to a wide variety of pediatric health conditions.</b> The trainee will assist with all clinic activities for 4-7 patients each week, and will be expected to write 1-10 progress notes weekly (growing over the course of the year). <b>(3)</b> There may be the opportunity to observe or learn to co-lead treatment groups for teens, in collaboration with a research program through the University of Oregon (but taking place at OHSU), pending funding. <b>(4)</b> There may also be the opportunity to support consultation in this domain for the Primary Care Program at OHSU. <b>(5)</b> Advanced students may have the opportunity to lead their own virtual group intervention. Training will be a blend of in-person, virtual, and telephone encounters with patients. <i>Program development and research will be integrated into the placement.</i>

<b>Didactic Training</b>	Multiple didactic training opportunities are available, including Pediatric and Psychiatry Grand Rounds, Psychology Intern training seminars, Psychology Division Journal Club, and other interdisciplinary CDRC training forums. Meetings directly related to this clinic may be required, and could be viewed as recordings. <i>Required readings and a virtual training will be included.</i>
<b>Supervision</b>	Kim Reynolds, PhD specializes in pediatric psychology, pediatric obesity, and developmental assessment. Traditional and live supervision.
<b>Hours (e.g., hours of clinic operation, required meeting times, months center is in operation)</b>	Direct patient contact 5-8 hours per week. Est. total 10-15 hrs per week of patient care, notes, readings, program dev. Clinic meets every Wednesday from 8:30 am to 5 pm. E/O Wednesday will likely be partially filled with patients and will include supervision, note writing time, and reading time. Report writing and other indirect activities are done outside of the clinical day and count toward the 10-15 hours per week.
<b>Evenings/Weekends?</b>	Possibly- to participate in a group intervention (optional)
