This project was supported, in part by grant number 90TBSG0039-01-00, from the U.S. Administration for Community Living, Department of Health and Human Services, Washington, D.C. 2020 and the ACL Underserved Populations Workgroup

## Presenter:

Caitlin Synovec is an occupational therapist whose professional experience and research has been with populations experiencing homelessness, psychiatric conditions, and health co-morbidities, including traumatic brain injury. She is currently a Subject Matter Expert with the National Health Care for the Homeless council specializing in addressing the cognitive and functional needs of those experiencing homelessness, with a goal to develop resources and training for clinicians and providers of vulnerable populations.

---

## Past Presenters:

Dr. John Corrigan's extensive research, publications, and on-line training programs have focused on long-term outcomes following traumatic brain injury (TBI) with an emphasis on screening for TBI, substance use disorder and behavioral health challenges. He is the Director of The Ohio Valley Center for Brain Injury Prevention and Rehabilitation with a background in counseling psychology.

Dr. Carolyn Lemskey is a board-certified neuropsychologist and Clinical Director at Community Head Injury Resource Services (CHIRS) of Toronto. Along with her partners at the Center for Addictions and Mental Health (CAMH), she has trained over 2000 mental health, addictions and ABI providers in basic skills needed to promote the development of more accessible addictions programming for people living with substance use and ABI.
